Profile Summary

I am a results-driven software engineer, adept at leveraging **Golang** and **Python** to develop robust, high-performance applications. With strong expertise in **database management**, I ensure efficient data handling and scalability. Additionally, I enhance user experience through **UI/UX design** and **Flutter-based mobile app development**, creating intuitive, seamless interactions across platforms.

Skills

Programming Languages Golang, Python , Javascript.
Frameworks Django, ReactJS, NodeJS.
Database Management MongoDB, SQLite3, NoSQL (JSON)
APIs & Microservices RESTful APIs
DevOps Practices Containerisation with Docker

Work Experience

Apprentice Software Engineer Sep 2023 - Present *zone01 Kisumu | Kenya*

- Contributed to the development of various software projects, gaining hands-on experience with **Golang** and **JavaScript**, along with modern development tools and frameworks.
- Implemented database optimization techniques to design and maintain efficient systems.
- Collaborated with fellow apprentices on code audits, enhancing quality and best practices. Together, we participated in hackathons and presentations, strengthening problem-solving skills and driving innovation.

Education

University of Eastern Africa, Baraton Nov 2019 - Apr 2023

 Bachelor of Science in Software Engineering.
